Dev Log 05 – Omar Al-Dib

1. WHAT I ACCOMPLISHED (Time taken approx. 5-6 hrs)

+/- **Openweather API !!!.**

+/- **Spent the entire time with Ibrahim, we managed to be able to retrieve the needed data and information from any given city**

2. WHAT I PLAN TO ACCOMPLISH BY NEXT TIME

+/- **Now that the weather API is pretty much complete, we have to try to try figure out the location aspect of it and have it go hand in hand with the weather**

+/-

3. WHAT QUESTIONS/DIFFICULTIES AM I HAVING

+/- **Juggling time I spend on project with other due dates is really being a burden, and still have to learn a lot more for android**

+/-

4. WHAT PROBLEMS DID I RESOLVE

+/- **Felt like a huge load off our chest with the weather API almost done, now as soon as we can retrieve a temperature/weather in a specific city we will pretty much be good for the app**

+/-
