Dev Log 03 – Omar Al-Dib

1. WHAT I ACCOMPLISHED (Time taken approx. 5-6 hrs)

+/- Went around campus with mockup design that we have to see what is more convenient and better looking to see which we will go with.

+/- Went over UI flow with the team, to see how menu will look and features the app will have

+/- Looked over the different features we could add to the app

+/- One of which was taking pictures, in which me and marcio sat down to try and figure it out.

2. WHAT I PLAN TO ACCOMPLISH BY NEXT TIME

+/- Must have clothes tags and types finalized to start saving them to pictures

+/- Having clothes save to gallery in its own folder

3. WHAT QUESTIONS/DIFFICULTIES AM I HAVING

+/- Saving pictures is not going as planned, it does look like it saves but now to its own specific folder

+/-

4. WHAT PROBLEMS DID I RESOLVE

+/- Camera finally works, not as well as we wanted but it saves. So hopefully we have it save and get stored in its own file going forward

+/-
