Dev Log 06 – Omar Al-Dib

1. WHAT I ACCOMPLISHED (Time taken approx. 4 hrs)

+/- Re-went over the tags and clothing types, had to categorize them all

+/- Fixed up some of the UI with Ibrahim, then chose which option looks best

2. WHAT I PLAN TO ACCOMPLISH BY NEXT TIME

+/- Planning on finishing the location aspect of the app, as in having the weather of a specific location... will be needed for pretty much entire app

+/-

3. WHAT QUESTIONS/DIFFICULTIES AM I HAVING

+/- Wondering how many tags would be ideal, and how easy it will be to integrate the weather api with the tags

+/-

4. WHAT PROBLEMS DID I RESOLVE

+/- Tags and UI are almost finalized

+/- Getting to know a lot of the plugins and options given from Android Studio, so that's a bonus
